

Aquarium Cooling Dual Fans

F60202

[Buy](#)

Jebo Multi fan F60202 is a fan cooling system. This cooling fan reduces water temperature by 2 to 4 degrees celsius. It is an ideal ventilation for reptiles, fish tanks, and aquatic plant insects. The cooling fan is suitable for aquariums up to 100 gallons fish tanks. If you have a saltwater tank with metal halide or power compact which produce lots of heat, the fan is perfect for blowing the hot air away from the fish tank. Even if you have a chiller to keep temperture steady during the warm summer, you will find the fan useful because it draws heat away from the aquarium. By doing so, you can reduce your energy cost.

Aquarium Fan Features

- Easy to install
- reduce temperature by 2 to 4 celsius or 3.6 to 7.2 fahrenheit
- Also great for ventilation for reptiles and aquatic plant insects
- Dual fans for effective cooling
- Rate Power 1.9 watt
